THE WORLD

SHAPE AND SIZE OF THE EARTH: The earth is very nearly an oblate spheroid, whose shorter axis coincides with its axis of rotation passing through the two poles.

According to Colonel Clarke's calculations, its major axis measures 41,852.124 feet, or 7,926.5 statute miles; its minor axis 41,710.242 feet, or 7,809.5 statute miles; its circumference along the Equator measures 24,902 statute miles, or 21,600 geographical miles; its total area 196,940,400 statute square miles; and its volume 259,880 million cubic miles.

Of this total area, 8.4 p. c. (16,464,700 sq. m.) are within the Arctic and Antarctic regions; 51.6 p. c. (102,344,654 sq. m.) within the two temperate regions; 40 p. c. (78,231,046 sq. m.) within the Tropics.

THE LAND: The land covers 54,807,430 sq. m., on the assumption that 250,000 sq. m. of land is to be discovered within the Arctic Region, and that the supposed Antarctic continent, or "Antarctis," has an extent of 2,500,000 sq. m. within the Antarctic Circle.

THE OCEANS: The oceans, including the inland seas connected with them, cover 142,132,980 sq. m., or 72 p. c. of the total surface of the earth. There are 2.59 sq. m. of ocean to every sq. m. of land. This area is distributed over the different areas as follows: Arctic Ocean, including Hudson Bay, 5,785,000 sq. m.; Atlantic Ocean, 34,301,400 sq. m.; Indian Ocean, 28,615,000 sq. m.; Pacific Ocean, 67,699,630 sq. m.; Antarctic Ocean, 5,731,350 sq. m.

HEIGHTS AND DEPTHS: The mean height of the land has been estimated at 2,440 feet; the mean depth of the sea 11,470 feet (Kartams). The highest mountain (Mt. Everest) rises to a height of 29,000 feet; the greatest depth of the ocean as yet discovered (in the Pacific, between Guam and Midway) is 31,614 feet. If the whole of the solid crust of the earth were to be levelled, as to form a spheroid, it would be covered by an ocean of a uniform depth of 8,000 feet (Prof. Penck).

PRINCIPAL CITIES OF THE WORLD

The following list contains the principal cities of the world. In it will be found approximately all places of more than thirty thousand inhabitants and many of those of from twenty to thirty thousand. The population figures are from the latest census or are estimates from the most reliable sources. Capitals of countries are indicated by an asterisk (*).
